# Kirby Cares for Your Eyes

Put your sight in the safest of hands. At Kirby Medical Center, our highly trained team provides eye procedures and cataract surgery in a warm and healing environment – all while keeping your care conveniently close to home.

## Meet Phillip D. Alward, M.D.

As a visiting ophthalmology specialist, Dr. Alward provides eye care and treatments on site at Kirby Medical Center in Monticello. Services include:

- **Cataract Surgery**

A common occurrence for those over age 50, cataracts cause vision loss by clouding the lens inside the eye. The surgery to correct cataracts is safe and effective, producing excellent visual outcomes in most instances by removing the clouded lens and replacing it with a synthetic one.

- **Dropless Cataract Surgery**

Unlike traditional cataract surgery, this dropless procedure is an advanced option that does not require the use of eye drops in the days and weeks before and after surgery. Rather, medicine is placed in your eye during surgery and absorbed over the following month, so you don't need to use separate drops.

- **Eye Procedures**

We provide routine and preventive eye care services, including comprehensive eye exams for all ages, treatment for eye injuries, and much more.

**To schedule a consultation with Dr. Alward or to learn more about Kirby's Ophthalmology Services, call (217) 877-5050.**
